

Minipan Portable Fire Trainer

-Easy push-in connections for LPG and power

-Fill tray with a standard bucket full of water

-Minipan is ready to operate via remote control

-Bin attachment can be used for fire blanket training

ICS Australia is pleased to present the Minipan Portable Fire Trainer.

Developed to be the smallest, most cost effective, and easiest to use fire extinguisher trainer on the market.

What you can expect:

- Un-extinguishable flame only turns off when the trainer is happy with the trainee's performance
- Very easy to set up and be operated by one trainer.
- Non-polluting training with high throughput.
- Fully automatic and failsafe remote operation.
- Operates using standard portable 12V standard jump-starter pack, 3m long power cord is supplied.
- Environmentally acceptable LPG is used as the fuel source.
- Flame height approximately 1m.
- Suitable for use with water, CO₂, foam, and dry powder extinguishers.
- Comes with 3m long LPG hose complete with regulator and quick-connect fittings for easy setup.
- Additional bin attachment is available for fire blanket training.
- Gas authority approved.
